Twitter : [@extropy](https://twitter.com/extropy)

Running workshops and hackathons since 2017

Course Outline

Week 1 - Introduction to blockchain and Ethereum

Week 2 - Solidity development

Week 3 - Dev Tools

Week 4 - Web3

Week 5 - Advanced Solidity

Week 6 - Decentralised Finance

Week 7 - Security

Week 8 - Interoperability / Other blockchains

Week 9 - Advanced EVM

Week 10 - Review / Project Week

We are aiming for a very practical course, our philosophy is that the best way to learn is to do
We encourage you to experiment, we are on hand to answer questions and support you.

Each week we will supply feedback forms so you can help shape this and future courses

During the final week we can review any material you would like to revisit

Week 1

Today - Course Introduction and Blockchain theory part 1

Thurs - Blockchain theory part 2

We will focus on EVM compatible blockchains

We have assumed no blockchain experience

How to ask questions ?

We have channels for questions

- Sli.do : <https://app.sli.do/event/llqkqynv>
- Discord technical questions

Put your questions in channels rather than asking individuals

Our team :

Karol, Tom, Vincent, Cosimo, Kirsty, Luke, Jean

How do practicals work ?

The lessons will typically be split 50/50 into theory and practical

During the practical half of the lesson you can work on exercises and ask questions in the support channel

We will review the exercises at the beginning of the next lesson.

The tools we will be using are

- Remix IDE
- VSCode / Truffle in Gitpod

Next lesson

Blockchain Theory 1
